Conditions of entry

The community weight loss challenge is a not for profit group who's aim is to help people reach and maintain their goal weight. All contestants enter the challenge as volunteers and can leave at any time. All information is supplied by the Herbalife scientific and medical research facility at UCLA, The use of Herbalife Products is not compulsory however we recommend you consider Herbalife products for safe and effective weight loss.

Contestants are free to follow any diet plan they chose, the emphasis is on safe and effective weight loss. The weight loss challenge is run and administered from the community health rebuilders office in Balmain A.C.N 143 035 376.

The prize money is limited to \$599 per contestant. The community weight loss challenge does not encourage unhealthy dieting practices and believes that companies offering large amounts of money for promotional purposes are irresponsible and can induce poor dieting behavior. At the beginning and end of the 12 week challenge you will be required to supply a before and after picture for verification purposes. Contestants will also be required to have their final weight and measurements verified by there doctors.

During the 12 week challenge you will receive course notes covering a different topic each week. You will also receive a link to a video that was taken at a live weight loss challenge. It is not compulsory to read the notes nor watch the video however its strongly recommended. You will be given a personal weight loss coach who will oversee your progress. You can call your coach as often as you like for support and guidance. Remember the weight loss challenge is about personal responsibility, we are here to help but in the end the results are up to each individual.
